Abstract. As part of a large pragmatic study, the authors investigated heart rate, blood pressure, dysrhythmic and ischemic responses to lidocaine 2% with a combination vasoconstrictor (noradrenaline 1:50,000 and vasopressin 0.25 IU/mL), and midazolam sedation in a medically compromised population.

**Critical care of the bariatric patient : Critical Care ...**

Obesity is a chronic inflammatory state with resultant effects on immune, metabolic, respiratory, cardiovascular, gastrointestinal, hematologic, and renal function. Principles of care of the critically ill obese patient are reviewed and then applied to critically ill bariatric surgical patients.
