Spinal Cord Stimulation: Principles and Practice | Nova ...

Spinal cord stimulation is a neuromodulation therapy for the treatment of chronic, intractable, neuropathic pain. It involves the implantation of electrodes over the dorsal columns of the spinal cord, in order to activate the dorsal column-medial lemniscal sensory system, thus closing the gate on pain transmission.

Coding Pain Should Not Be a Pain - AANS Neurosurgeon

For decades, pain surgery has been neurosurgery's stepchild. Few took interest in it, lesioning of the nervous system suffered the stigma inflicted by psychosurgery, and the field was being slowly absorbed by anesthesiology and psychiatry. Luckily, the neurosurgeon's attitude towards humanity's most prevalent chief complaint is changing.
