Applied Linear Algebra and Matrix Analysis - epdf.tips

Suppose a linear system has augmented matrix A upon which an elementary row operation is applied to yield a new augmented matrix corresponding to a new linear system. Then these two linear systems are B equivalent, i.e., have the same solution set, by the Proof. If we replace the variables in the system corresponding to A values of a solution, the resulting equations will be satisfied. Now Download: Matrix Analysis And Applied Linear Algebra By ...
