Aristotle, great Greek philosopher, researcher, reasoner, and writer, born at Stagirus in 384 BCE, was the son of Nicomachus, a physician, and Phaestis.

Philosophical Biology in Aristotle's Parts of Animals ...  
As we have already noted, Aristotle is interested in looking at actions and movements of animals and animal parts that are common, according to kind (genos) and according to form (eidos). This breakdown ultimately has a bearing on our understanding of the dialectic between the teleological and the necessary explanations of the cause of certain parts. A teleological account might be thought to  
History of Animals - Wikipedia

Book I The grouping of animals and the parts of the human body. Aristotle describes the parts that the human body is made of, such as the skull, brain, face, eyes, ears, nose, tongue, thorax, belly, heart, viscera, genitalia, and limbs. Book II The different parts of red-blooded animals. [The Internet Classics Archive | On the Motion of Animals ...](#)

Part I Elsewhere we have investigated in detail the movement of animals after their various kinds, the differences between them, and the reasons for their particular characters (for some animals fly, some swim, some walk, others move in various other ways); there remains an investigation of the common ground of any sort of animal movement
