[9 Signs and Symptoms of Celiac Disease - Healthline](#)  
Celiac disease is a disorder in which eating gluten triggers an immune response in the body. This article takes a look at the most common signs and symptoms of celiac disease. [Celiac disease - Symptoms and causes - Mayo Clinic](#)  
Celiac disease, sometimes called celiac sprue or gluten-sensitive enteropathy, is an immune reaction to eating gluten, a protein found in wheat, barley and rye. If you have celiac disease, eating gluten triggers an immune response in your small intestine. Over time, this reaction damages your small intestine's lining and prevents it from absorbing some nutrients (malabsorption). The intestinal [Celiac Disease LifeLabs](#)

Celiac disease is an autoimmune disorder triggered by eating grains that contain gluten such as wheat, rye and barley. Over time, this autoimmune response to a perceived threat can cause irreversible damage to the small intestine and prevent your body from absorbing nutrients critical for good health.
