She has managed to classify a complex subject clearly and usefully. It is a shame that these concepts have been left behind in a world which diagnoses abnormalities based on lab results.

Dermatoglyphics - Wikipedia

Dermatoglyphics (from Ancient Greek derma, "skin", and glyph, "carving") is the scientific study of fingerprints, lines, mounts and shapes of hands. Dermatoglyphics refers to the making of naturally occurring ridges on certain body parts, namely palms, fingers, soles, and toes. These are areas where hair usually does not grow; and these ridges allow for increased leverage when picking up
