1.3 Two Approaches to Environmental Enrichment The study and implementation of environmental enrichment has been dominated by two approaches since its inception: the naturalistic approach, that relies upon creating the wild environment in captivity to provide stimulation for captive animals. [Environmental Enrichment for Captive Animals](#) Part 1 addresses the theoretical bases of environmental enrichment, part 2 looks at enrichment in animal conservation and welfare, and part 3 examines enrichment in captive management, husbandry, and training.

[Environmental Enrichment: A Review](#)

Recently there is increasing research interest in improving the welfare of captive animals, but there has been less interest in the rigorous operational definition of terms used in the description of environmental 'improvement' or enrichment, in evaluating the cost-effectiveness of enrichment, or in the development of theoretical models that guide research and integrate divergent studies.

Sensory stimulation as environmental enrichment for

...

In the wild, animals are exposed to an ever-changing array of sensory stimuli. The captive environment, by contrast, is generally much more impoverished in terms of the sensory cues it offers the animals housed within.

CAPTIVE ANIMAL ENCLOSURE ENRICHMENT MANUAL

Environmental enrichment improves or enhances captive environments for animals, stimulating them to investigate and interact with their surroundings. We enrich animal environments by making changes to structures in their enclosures, presenting novel objects
