C++ openFrameworks addon for particle/constraint based physics library with springs, attractors and collision. It uses a very similar api to the traer.physics library for processing to make getting into it as easy as possible. All classes are template based with typedefs for physics in 2D or 3D - Potentially even more dimensions! Get down to deeper fish with this specially designed in-line spinner from Blue Fox. The 30-degree blade rotates easily but doesn't give as much lift as other blade types, so your bait stays down in front of the fish.
