Geothermal energy can play a role in the energy matrix of many countries. Geothermal was 68% of the gross energy consumption in Iceland in 2013, with hydropower 18%, oil 12% and coal 2%. Domestic energy use was 86% of the energy consumed.

[Geothermal Energy Technology - RenewableEnergyWorld.com](#)

Geothermal energy is the heat from the Earth. It's clean and sustainable. Resources of geothermal energy range from the shallow ground to hot water and hot rock found a few miles beneath the Earth's surface, and down even deeper to the extremely high temperatures of molten rock called magma.

[Geothermal energy - Energy Education](#)

Geothermal energy refers to primary energy that is extracted from the thermal energy deep underground. This thermal energy can be used directly for heat or to create electricity. Deep underground, the Earth will remain hot for billions of years, so geothermal energy can be used for a long time (as a renewable energy source), but if the resource isn't treated carefully, it won't be sustainable. [Geothermal Energy is on a Hot Path - worldbank.org](#) Although geothermal energy has received wide recognition as a transformational resource, the prohibitively risky and expensive early-stage development has been a barrier to private sector investment and led to a slow growth of installed geothermal capacity for the past couple of decades.

[Geothermal energy - Wikipedia](#)

Geothermal energy is thermal energy generated and stored in the Earth. Thermal energy is the energy that determines the temperature of matter. The geothermal energy of the Earth's crust originates from the original formation of the planet and from radioactive decay of materials (in currently uncertain [1] but possibly roughly equal [2] proportions).

#### Geothermal Energy

A geothermal system costs \$3,000-5,000 per 10,000 Btu output to install, according to the Integration of Renewable Energy on Farms website, and \$100-150 per 10,000 Btu output to operate. The life expectancy of the heat pump will vary depending on the type, while most pipes carry a warranty of at least 25 years.
