Degradative solvent extraction of demineralized and ion ...

Ion-exchange further improved the distribution of carbon in soluble, especially for Na ion-exchange. Demineralization and ion-exchange exhibited little impact on the distribution of carbon in UC. Figure 5 showed the oxygen distribution in products from degradative solvent extraction. 38.8% of oxygen in dem.-MM was transferred into the liquid fraction, much more than that (26.4%) in raw coal.
