[Beginners Guide to Master Data Management \(MDM\) - Data ...](#)

MDM is a technology-enabled discipline in which business and IT work together to ensure the uniformity, accuracy, stewardship, semantic consistency and accountability of the enterprise's official shared master data assets.

[What is master data management \(MDM\)? - Definition from ...](#)

Master data management (MDM) is a comprehensive method of enabling an enterprise to link all of its critical data to a common point of reference.

[Master data management - Wikipedia](#)

In business, master data management (MDM) is a method used to define and manage the critical data of an organization to provide, with data integration, a single point of reference. The data that is mastered may include reference data - the set of permissible values, and the analytical data that supports decision making.

[Best Master Data Management \(MDM\) Software in 2019 | G2](#)

Master data management (MDM) software tracks the most essential company-wide data points, also known as master data, and provides insights related to company operations, clients, and goals.

[Master Data Management in 2019: Definition & Benefits ...](#)

Master data management (MDM) is the effort made by an organization to create one single master reference source for all critical business data, leading to fewer errors and less redundancy in business processes.

[What is Master Data Management? - stibosystems.com](#)

Master data management (MDM) is the core process used to manage, centralize, organize, categorize, localize, synchronize and enrich master data according to the business rules of the sales, marketing and operational strategies of your company.

[Master Data Management \(MDM\) - Gartner IT Glossary](#)

Master data management (MDM) is a technology-enabled discipline in which business and IT work together to ensure the uniformity, accuracy, stewardship, semantic consistency and accountability of the enterprise's official shared master data assets.

[Master Data Management \(MDM\) Using SQL Server - Simple Talk](#)

Master data management (MDM), defines a process of collecting enterprise data from various sources, applying

standard rules and business processes, building a single view of the data, and finally distributing this golden version of data to various systems in the enterprise, thereby making it accessible to all consumers.

What is a master data management system?

Ideally, a single copy of key master data would be managed by an MDM System all applications that needed master data would be serviced by this system, and all updates to master data would be made through the MDM System. The master data in the ideal MDM implementation can be considered a system of record. That is, the data managed by the MDM System is the best source of truth. If applications
