...

How to: Multi-criteria Analysis Part 1 This three-part post will walk step-by-step through a multi-criteria analysis, a formal decision process you might use when making a weighty decision. Here are the steps:

Methods and Tools - MultiCriteria Analysis

Multi-Criteria Analysis (MCA) is a decision-making tool developed for complex problems. In a situation where multiple criteria are involved confusion can arise if a logical, well-structured decision-making process is not followed.

Multi-Criteria Analysis | Better Evaluation

A Multi-Criteria Analysis (MCA) is when a project is evaluated by more than just monetary terms. It is a form of

appraisal that, in addition to monetary impacts, measures variable such as material costs, time savings and project sustainability as well as the social and environmental impacts that may be quantified but not so easily valued.
