If we wanted to precisify the edge of the hill, we could end up with a line like this, but this does not mean that this line could or might be the edge of the hill. There is some sort of modality involved in precisification thus understood, but this is not the usual alethic, epistemic or deontic modalities that you think; it must be a sui-generis

Objects and Identity in Time *Aporia* vol. 18 no. 1 2008 *Cassirer* I could have started this sentence in a different way. I could have even written no sentence at all, but I did, in fact, write one, and I wrote it in a particular way and not in any other. Talking about the first sentence that I actually wrote, and the possibility that I could have written it some other way

Object Identity | Microsoft Docs

In LINQ to SQL, the `DataContext` manages object identity. Whenever you retrieve a new row from the database, the row is logged in an identity table by its primary key, and a new object is created. Whenever you retrieve that same row, the original object instance is handed back to the application. In this manner the
