Properties. The properties that make pharmaceuticals useful are the same properties that make them hazardous. Pharmaceutical companies invest billions of dollars every year to develop substances able to affect human metabolism at very low concentrations.

[Anthracycline - Wikipedia](#)

Daunorubicin is a red pigmented drug which was discovered in the early 1960s. It was isolated from a strain of *Streptomyces peucetius* by Di Marco and coworkers, working for Farmitalia Research Laboratories in Italy who called it daunomycin. About the same time Dubost and coworkers in France also discovered the compound and named it rubidomycin.

#### **Anthracycline Wikipedia**
