Tackling Long-Term Global Energy Problems - The ...  
Featuring eight studies from across the spectrum of the  
social sciences, each applying multiple disciplines to one  
or more energy-related problems, the book demonstrates  
the strong analytical and policy-making potential of such a  
broadened perspective. Case studies include: energy  
transitions of households in developing countries, the curse  
of oil, politics and visions for renewables, economics and  
ethics in emissions trading, and carbon capture and  
storage.

SpringerLink

The authors characterise the most pressing global energy  
problems, discuss the role of social science in analysing  
and addressing them and offer recommendations for  
research agendas. Academies as well as practitioners  
working in the energy field will find the contents relevant  
and thought-provoking.
