Sedation in the Imminently Dying Patient | Cancer Network

ABSTRACT: Sedation is a clinically important therapeutic intervention in the imminently dying patient. As the patient with an advanced, irreversible illness nears the end of life, symptoms accumulate that are progressively more difficult to manage and that may become refractory to standard medical interventions.

The Dying Patient - Special Subjects - Merck Manuals ...

Planning for symptom relief as well as receiving patient and family support can help people deal with the most difficult parts of dying. When death is expected to occur at home, a hospice team typically provides drugs (a comfort kit) with instructions for how to use them to quickly suppress symptoms, such as pain or dyspnea. Family members should be told about changes that are likely during
