[5 Reasons We May Live in a Multiverse - Space.com](#)
The universe we live in may not be the only one out there. In fact, our universe could be just one of an infinite number of universes making up a "multiverse."

[Multiverse - Wikipedia](#)

The multiverse is a hypothetical group of multiple universes including the universe in which we live. Together, these universes comprise everything that exists: the entirety of space, time, matter, energy, the physical laws and the constants that describe them.

The object of this book is to describe my new theory on the creation of our uni-verse in a multi-universe cosmos. The new cosmological model eliminates the troublesome singularity-big bang theory and explains for the first time the origin of matter and the overwhelming electromagnetic radiation contained in the universe. My new theory also predicted the existence of high-energy gamma rays.
[What is the multiverse theory? - GotQuestions.org](#)
Question: "What is the multiverse theory?" Answer: In summary, the multiverse theory was invented to explain away the clear evidence of design in the universe along with the fact that the universe is finely-tuned to support life (the anthropic principle).
