Trauma Informatics | SpringerLink

A simple answer would be anyone who takes care of trauma patients. From a broader perspective, however, at least three examples illustrate how trauma informatics can be used today to exert a positive effect on patient outcome. The first example is care of combat casualties, including battlefield resuscitation, evacuation, acute care, and ultimate return to the continental United States.

Trauma Informatics (eBook, 1998) [WorldCat.org]

The medical discipline is uniquely linked to the speed and real time environment of computer mediated information management. The three phases of trauma care (pre-hospital; hospital; and post- acute/rehabilitation) are based upon a philosophy of a continuum of care, which in turn necessitates a continuum of information.
