inadequate for understanding the effects of the chosen spatial resolution. They have difficulty discriminating between land use/cover classes that have complex spectral/spatial features and patterns.

[Top-grain filling characteristics at an early stage of ...](#)

Better understanding of early grain filling characteristics of maize is important, especially for maize with different NUEs. The objectives of this research were (i) to investigate the difference in apical kernel development of maize with different NUEs, (ii) to determine the reaction

of apical kernel development to N application levels, and (iii) to evaluate the relationship between apical kernel development and grain yield (GY) for different genotypes of maize. Three maize hybrid varieties

Analysis (Stanford Encyclopedia of Philosophy)

Connective analysis, historically inflected, would seem to be particularly appropriate, for example, in understanding analysis itself. Bibliography What follows here is a selection of thirty classic and recent works published over the last half-century that together cover the range of different conceptions of analysis in the history of philosophy.

A Module-Oriented Optimization Tool - ScienceDirect

This chapter focuses on the module-oriented optimization methodology and on the rational constraints. The development of the LBR-5 Stiffened Panels Software is included in the development of a new design methodology to ease and to improve preliminary studies of naval structures and floating hydraulic structures.
