[PDF] Variable Income Equivalence Scales An Empirical ...

An equivalence scale relates the income of any arbitrary household type to the income of a reference household such that both households are equally well-off. Differences in household needs arise from differences in the households' demographic composition which is, for instance, given by the number, age, and sex of the household members. The increase of household needs is not necessarily

level and, in particular, the composition of income poverty are affected by the use of different equivalence scales, trends over time and rankings across countries are much less affected (Burniaux et al., 1998).

A new framework of measuring inequality: Variable ...
variable equivalence scales are explicitly and extensively
applied in a distributional analysis of German data which
causes significant increases of income inequality compared
with income-independent, constant equivalence scales.
