What is special about the human brain? - Oxford Scholarship

It is plausible that evolution could have created the human skeleton, but it is hard to believe that it created the human mind. Yet, in six or seven million years, evolution came up with Homo sapiens, a creature unlike anything the world had ever known. The mental gap between man and ape is immense, and yet evolution bridged that gap in so

What Makes Our Brains Special? - Scientific American

The human brain is unique: Our remarkable cognitive capacity has allowed us to invent the wheel, build the pyramids and land on the moon. In fact, scientists sometimes refer to the human brain as

Human brain - Wikipedia

The human brain consumes approximately 60% of blood glucose in fasted, sedentary individuals. Brain metabolism normally relies upon blood glucose as an energy source, but during times of low glucose (such as fasting , endurance exercise , or limited carbohydrate intake), the brain uses ketone bodies for fuel with a smaller need for glucose.

Suzana Herculano-Houzel: What is so special about the ...

The human brain is puzzling -- it is curiously large given the size of our bodies, uses a tremendous amount of energy for its weight and has a bizarrely dense cerebral cortex.

But: why? Neuroscientist Suzana Herculano-Houzel puts on her detective's cap and leads us through this mystery. By making "brain soup," she arrives at a startling conclusion.

[What Are Human Rights? | Canadian Human Rights Commission](#)

Human rights describe how we instinctively expect to be treated as persons. Human rights define what we are all entitled to a life of equality, dignity, respect, and a life free from discrimination. You do not have to earn your human rights. You are born with them. They are the same for every person.
